

1. Venue-wise Analysis

V_Gamma

- * Median Crowd_Energy: ~70 - highest among all venues.
- * Crowd_Size: consistent with all other venues (520–547).
- * Hour of the Day: little influence after 10:00.
- * Weather: weak correlation with crowd energy.
- * Price Sensitivity: low.
- * Weekend Effect: ~4% higher crowd energy.
- * Merchandise Sales: very strong correlation with crowd energy.

V_Alpha

- * Median Crowd_Energy: 51–56.
- * Crowd_Size: consistent with all other venues (520–547).
- * Concert Hours: mainly 10:00–23:00.
- * Hour of the Day: slight peak at 12:00, otherwise little influence.
- * Volume Levels: generally low; weak correlation with crowd energy.
- * Moon Phase: very weak correlation with crowd energy.
- * Band Outfit: very weak correlation with crowd energy.
- * Weather: weak correlation with crowd energy.
- * Price Sensitivity: low.
- * Merchandise Sales: very strong correlation with crowd energy.
- * Weekend Effect: ~4% higher crowd energy.

V_Beta

- * Median Crowd_Energy: 51–56.
- * Crowd_Size: consistent with all other venues (520–547).
- * Concert Hours: 6:00–23:00.
- * Hour of the Day: nearly constant crowd energy from 6:00–11:00, decreases till 14:00, then rises till 23:00.
- * Moon Phase: very weak correlation with crowd energy.
- * Band Outfit: very weak correlation with crowd energy.
- * Weather: weak correlation with crowd energy.
- * Price Sensitivity: low.
- * Merchandise Sales: very strong correlation with crowd energy.
- * Weekend Effect: ~4% higher crowd energy.

V_Delta

- * Median Crowd_Energy: 51–56.
- * Crowd_Size: consistent (520–547).
- * Concert Hours: mainly 10:00–23:00.
- * Hour of the Day: little influence after 10:00.
- * Moon Phase: very weak correlation with crowd energy.
- * Band Outfit: very weak correlation with crowd energy.
- * Weather: weak correlation with crowd energy.
- * Price Sensitivity: slightly higher than other venues; hypothesis partially supported.
- * Merchandise Sales: very strong correlation with crowd energy.
- * Weekend Effect: ~4% higher crowd energy.

2. General Observations Across Venues

* Venue Influence

- * Venue ID strongly influences Crowd_Energy but has minimal effect on Crowd_Size.
- * V_Gamma is the major contributor to high crowd energy.

* **Day of the Week**

- * Weak correlation with crowd energy.
- * Hypothesis that 'Tuesdays are cursed' is not supported.
- * Venue V_Gamma has performed well on some Tuesdays.
- * Weekends show slightly higher crowd energy (~4%), though margin is narrow.

* **Volume Levels**

- * Weak correlation with crowd energy.
- * Venue V_Alpha generally has low volume.
- * Hypothesis that low volume causes low crowd energy is not supported.

* **Crowd Size**

- * Relationship with crowd energy is non-linear and weak.
- * Hypotheses about crowd size affecting energy are not supported.

* **Hour of the Day**

- * Little influence on crowd energy for venues after 10:00.
- * Some peaks observed (e.g., V_Alpha at 12:00).
- * Hypothesis partially supported.

* **Moon Phase**

- * Very weak correlation with crowd energy.
- * Full moon shows no special performance.
- * Hypothesis not supported.

* **Band Outfit**

- * Very weak correlation with crowd energy.
- * Hypothesis that outfits affect energy is not supported.
- * Misconceptions (e.g., spandex or red sock) are not true.

* **Weather**

- * Weak correlation with crowd energy.
- * Storms do not affect outdoor venues disproportionately.
- * Average crowd energy order across weathers generally: $V_Gamma > V_Delta > V_Beta > V_Alpha$.

* **Price Sensitivity**

- * Venues V_Alpha, V_Beta, V_Gamma: low sensitivity.
- * V_Delta: slightly price sensitive; partially supports hypothesis.

* **Opener Rating**

- * Weak correlation with crowd energy.
- * Hypothesis that opener rating affects crowd energy is quite not supported.

* **Merchandise Sales**

- * Very strong correlation with crowd energy at all venues.
- * Hypothesis that crowd energy has strong correlation with merchandise sales is strongly supported.

* **Volume vs Crowd Size**

- * Both have weak correlation with crowd energy; no meaningful distinction about which matters more.
